understanding

VA8 appreciates the significance of Australian scientific and technological expertise across gender and cultural groups

### **Human Society and Its Environment K-6**

#### **Social and Civic Participation**

Skills associated with social and civic participation enable citizens to accept and fulfil their social responsibilities. The skills developed in this key learning area will enable students to:

- listen to others, respond to each other's ideas and advance their own ideas;
- participate in activities and discussions;
- work productively individually, with partners and in groups;
- cooperate and negotiate;
- participate in delegating duties, organising, planning and making decisions;
- keep informed about current and relevant social and environmental issues;
- behave as responsible and informed citizens in school, family and community contexts;
- participate in appropriate forms of individual and group action that inform, encourage or initiate operations and solve problems;
- participate in activities associated with family, school and community events;
- participate in environmental management and improvement activities;
- reflect on the impact of particular decisions and actions;
- accept specific roles and responsibilities;
- consider their own rights and the rights of others;
- acknowledge different kinds of citizenship.

#### **Intercultural Understanding**

- identifying and appreciating the cultural, linguistic and spiritual heritages of oneself and others;
- respecting different viewpoints, ways of living, belief systems and languages;
- empathising with people of different cultures and societies;
- recognising that cultural and religious groups may differ in their views on moral issues;
- supporting cultural diversity within a cohesive society.
